Anton Sankov

Senior Software Engineer, currently dedicated to the Cloud Native Security space.

For more complete version of this CV, go to **asankov.dev/cv**.

WORK EXPERIENCE

VMware Carbon Black   📍 *Sofia, Bulgaria (on a remote team)*

Senior Member of Technical Staff   *January 2022 - Present*

Member of Technical Staff   *June 2020 - January 2022*

At VMware I worked on the Carbon Black Cloud Container Security product, which provides end-to-end Kubernetes Security (supply-chain to runtime)

Responsibilities

– write clean and maintainable code, do code reviews, onboard new team members
– communicate with internal and external stakeholders (PM, UX, QA, customers)
– communicate with other teams regarding work on shared components
– write technical documents (RFCs/JEDIs/TASAs, Engineering Analysis, customer-facing product documentation)
– participate in the hiring process - interview people for my and other teams, helped grow the BU in Sofia from 4 to >100 people
– participate in Talent Boost - VMware Academy for students
– present the work of our team on BU-wide meetings and demos, and also external events

Tech Stack

Go, gRPC, Kubernetes, Helm, MongoDB, Terraform, Kafka

Docker Inc./ Mirantis Inc.   📍 *Sofia, Bulgaria (on a remote team)*

Software Engineer   *August 2019 - June 2020*

At Docker I worked on a few products, part of the Docker Enterprise (Docker EE) stack. In November 2019 that part of the company was acquired by Mirantis and I was included in the acquisition.

Responsibilities

– write clean and maintainable code, do code reviews, onboard new team members
– communicate with internal and external stakeholders (PM, UX, QA)
– write technical documents (RFCs/JEDIs/TASAs, Engineering Analysis, customer-facing product documentation)
– present the work of our team in company-wide meetings and demos

Tech Stack

Go, gRPC, Docker, Kubernetes, PostgreSQL

Paysafe   📍 *Sofia, Bulgaria*

Software Engineer   *April 2019 to August 2019*

Junior Software Engineer   *May 2018 to April 2019*

At Paysafe I worked on integrating crypto-currency trading into the company's two digital wallets - Skrill and Neteller.

Responsibilities

– write clean and maintainable code, do code reviews, onboard new team members
– do full-stack work - both back-end and front-end
– communicate with internal and external stakeholders (PM, UX, Legal, Compliance, Accounting)
– present the work of our team in company-wide meetings and demos

Tech Stack

Java SE/EE, Spring (Boot) - Netflix Stack, SQL, Angular 2+

SAP Labs Bulgaria   📍 *Sofia, Bulgaria*

Software Engineering Intern   *June 2017 to December 2017*

At my first actual job in IT I worked on the provisioning framework of SAP Cloud Platform. My responsibilities were to work on the product alongside the team. Mostly, I was learning how to work on a big legacy project at scale and how to work in a team.

Tech Stack

Java EE, SAP Cloud Platform, SAP UI5
